

Swatch – Watch Design

Date:

Name:

Swatch watches are especially designed to be very decorative. The whole of the face and straps are covered in colour and detail. This page is designed to give you the opportunity to come up with your own unique watch designs.

By doing this exercise you will have practiced 'surface pattern' design which is the art of applying a decorative surface. All the wallpapers, clothes and even umbrellas in your house have been designed by specialist surface pattern designers.

Brief:

The first design is done in black and white. Your task is to colour it in so it looks attractive.

After you have practiced this add surface pattern on the rest to suit the theme labels underneath each watch.

Extension: after you have done the designs choose one and make a full sized paper model.

Tip: one way to get the size right is draw around your watch or someone else's. Alternatively the large watch on this sheet of paper can be traced over.
