

TASK 1: Below are two illustrations. One is of an injection moulding machine with labels and the other is a glue gun. To show you understand the similarity of how they work use the same labels to label the glue gun. You may colour in the gun, if there is time.

Injection Moulding Machine

Glue Gun

TASK 2:

Use DT books, school network or the www to investigate the two production methods mentioned below. For each investigation produce a sketch and add labels, to show you understand how they work.

Look up- **Extrusion** and **Blow Moulding**

Produce this work on a blank page or separate piece of paper. **Explain/label** each process. Make sure you clearly **title** it and put your **name** on it.

When you paste it in, or use a blank page, write the page number here- _____
